### **DETAILED ACTION**

This action is responsive to Applicant's amendments and arguments of 6/20/2007, along with filing of terminal disclaimers with respect to US Patent Nos. 7,070,112, 6,749,123, 6,764,014, 6,581,839 and US Application No. 10/394,914.

#### ***Allowable Subject Matter***

Claims 1-4,7-15,19,23-43 and 46-62 are allowed.

The following is an examiner's statement of reasons for allowance:

The Applicant has resolved all remaining issues by filing Terminal Disclaimers with respect to US Patent Nos. 7,070,112, 6,749,123, 6,764,014, 6,581,839 and US Application No. 10/394,914. These terminal disclaimers have been approved and as a result, all double patenting rejections are withdrawn.

Indeed reasons for allowance are clear from the records of both the present Application and the above related cases. The prior art fails to teach or fairly suggest a card having a machine recognizable compound containing an infrared blocking material over the whole surface of the card, such that the card or a portion thereof is transmissive to visible light all the way through.

The extensive prosecution history in this and the above related cases details the various relevant prior art and its shortcomings. Some of the closest art consists of infrared blocking material as a coding on the surface of a transparent card. The blocking

material in such art is not continuous over the surface, a critical feature of the Instant Invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
